	Examiner Chandrika Prasad	Art Unit 2839	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Specification

1. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-2 and 5-13 are rejected under 35 U.S.C. 102(b) as being anticipated by Paagman (5924899).

Paagman (Figures 1-3b) shows an integrated multi-chip connector module and its assembly method having a plurality of substrate assemblies stacked in a housing 82, each substrate assembly having a substrate 24 with a plurality of integrated circuits attached to it, a set of input and output pins 68, 42 with first ends electrically connected to the circuits on the substrate and second ends protruding through apertures in the housing 82. The pins are anchored to the substrate by anchoring means. Pins 42 are oriented differently from other pins. The circuit would receive electrical signals at one voltage and output at another voltage as moderated by chips 78. The pins can be coupled to a backplane or an external line card.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 3-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Paagman (5924899).

Paagman shows all the features of these claims except the second ends terminating in an electrically conductive pad or cusp. Such features are well known in the art of electrical connectors. It would have been obvious to one having ordinary skill in the art at the time of the instant invention to provide these well known features depending upon the type of contact or mounting desired.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Ferentz (6764343), Farago (4972470), Brunelle et al. (6721195), Bickford (6398588), La Rue (6081430), Smolley (5007841) and Benasutti (4390220).
